

```

#include <stdio.h>

// Function to perform Shell Sort
void shellSort(int arr[], int n) {
    int gap, i, j, temp;

    // Start with a large gap, then reduce the gap
    for (gap = n / 2; gap > 0; gap /= 2) {

        // Perform insertion sort for this gap
        for (i = gap; i < n; i++) {
            temp = arr[i];

            // Shift earlier gap-sorted elements up
            for (j = i; j >= gap && arr[j - gap] > temp; j -= gap) {
                arr[j] = arr[j - gap];
            }

            arr[j] = temp;
        }
    }
}

// Function to print array
void printArray(int arr[], int n) {
    for (int i = 0; i < n; i++)
        printf("%d ", arr[i]);
}

// Main function
int main() {
    int n;

    printf("Enter number of elements: ");
    scanf("%d", &n);

    int arr[n];

    printf("Enter elements:\n");
    for (int i = 0; i < n; i++)
        scanf("%d", &arr[i]);

    shellSort(arr, n);
}

```

```
printf("Sorted array:\n");  
printArray(arr, n);  
  
return 0;  
}
```

The image shows a terminal window titled "Terminal" with a dark background and light text. On the left side, there is a vertical list of line numbers from 25 to 49. The terminal output shows the following sequence of events:

- Line 25: "Enter number of elements: 4"
- Line 26: "Enter elements:"
- Line 27: "12"
- Line 28: "3"
- Line 29: "4"
- Line 30: "5"
- Line 31: "Sorted array:"
- Line 32: "3 4 5 12"
- Line 33: "-----"
- Line 34: "(program exited with code: 0)"
- Line 35: "Press return to continue"
- Line 36: A cursor is visible on the line.

At the bottom of the terminal window, the word "Compiler" is visible next to an orange vertical bar.
